EXPERIENCE

Technician (Part-Time)

October 2025 – Present

Bestlloyd84 cellphone repair services

Makati City

- Hardware Diagnostics & Repair: Partnered daily with a senior technician at Bestlloyd84 Cellphone Repair Services to diagnose, repair, and prepare smartphones and laptops for resale in a fast-paced environment.
- Web & Software Development: Applied self-directed training in modern frontend frameworks and WordPress to design, build, and launch a performance-focused personal portfolio.
- Repository Management & Integration: Maintained active GitHub repositories to demonstrate clean code standards, showcasing continuous self-driven growth from hardware troubleshooting to software engineering.

Frontend | WordPress Developer (Freelance)

October 2024 - October 2025

W. Bridge Manpower Corp.

Pasay City

- Designed, developed, and maintained 100+ responsive WordPress websites using HTML, CSS, JavaScript, and Elementor, optimizing UI/UX, mobile responsiveness, performance, and Core Web Vitals while meeting client standards.
- Conducted technical SEO audits, schema markup implementation, and on-page SEO, resolving 200+ crawl/indexation issues and improving organic visibility and search performance.
- Troubleshoot and resolved server, DNS, SSL, Cloudflare, and caching issues, collaborating with clients to deliver high-performing, accessible, and user-friendly web solutions.

Frontend | WordPress Developer

June 2024 - October 2024

W. Bridge Manpower Corp.

Pasay City

- Assisted in designing and developing custom WordPress themes and plugins, ensuring high-quality, responsive, and maintainable code under senior developer guidance.
- Collaborated with cross-functional teams to implement website features, optimize UI/UX, and ensure alignment with project requirements and design specifications.
- Stayed updated on WordPress best practices, industry trends, and regulatory standards, applying knowledge to enhance website performance, SEO, and front-end functionality.

Solutions Developer, I03

April 2022 - May 2023

LPS (Lenovo PCCW Solutions)

Pasig City

- Developed and maintained application programs, performing API integration, system testing, and operational support to ensure reliable software performance.
- Prepared and executed test plans, test cases, and test environments, coordinating with users, technical teams, and operations to validate requirements and functionality.
- Conducted requirement analysis, system documentation, and solution design, collaborating cross-functionally to deliver scalable and maintainable software solutions.

Software Engineer Intern (OJT)

April 2021 - July 2021

Stock Knowledge

Makati City

- Assisted in software development, reporting and updating issues on Git repositories, and documenting software features, functionalities, and code.
- Developed flowcharts, layouts, diagrams, and charts to analyze requirements, design solutions, and improve system performance and responsiveness.
- Collaborated cross-functionally with data scientists, subject matter experts, content creators, artists, and engineers to deliver high-quality, maintainable software solutions.
